EVERGREEN TREES AND SHRUBS

Princeton Evergreens have been transplanted several times. Each time they have been given ample room for compact growth. Every one is sheared into a symmetrical shape. No "run of the row" here, but each one trained in the way it should grow—a specimen.

Freshly dug in the nursery for your individual order.
Balled and burlapped unless marked with an (*).

"You certainly will have no trouble getting good prices for these Pyramids" said a visiting nurseryman. But we have not priced them higher than most people ask, even though we feel the same way. Sheared not by the calendar but as the growth demands it.

For Light Soils

Light Spades, D-handle, double strapped, black iron finish, \$2.50 each. Square or tapered.

PLANET JR. HORSE AND HAND CULTIVATORS

We use Planet Jr. Tools exclusively at the Princeton Nurseries, and find the following types especially suited to our purposes around the nursery.

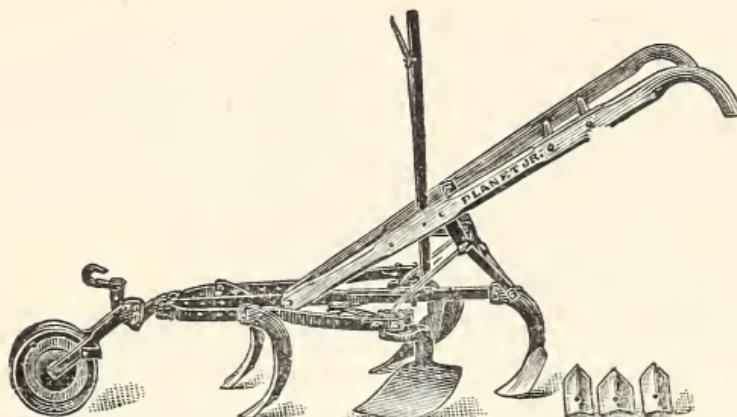

No. 12. Double Wheel Hoe, with gardener's attachments. Price \$11.50.

No. 17. Single Wheel Hoe, with attachments. Price \$7.50.

We use these Hand Wheel Hoes when planting our seed beds, and when the seeds have grown, these Hoes keep cultivating them until they are finally transplanted into nursery rows.

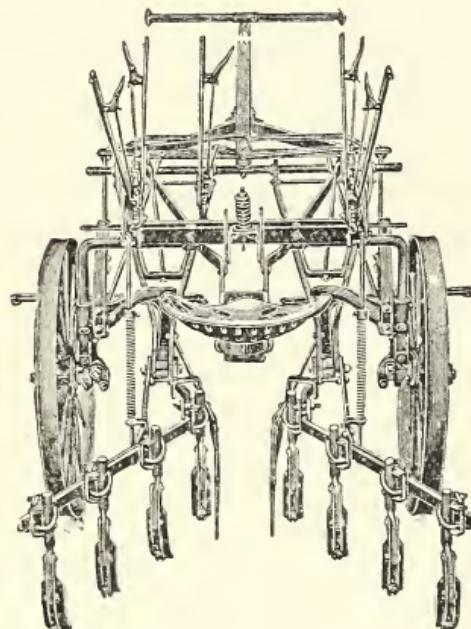

Very good for beds and transplant frames without sides. Can be used anywhere there is room enough for a man to walk.

NO. 9 HORSE HOE

No. 9 HORSE HOE, cannot be beat for all round work. Width easily changed. Handles adjustable.

Price \$17.50 as illustrated.

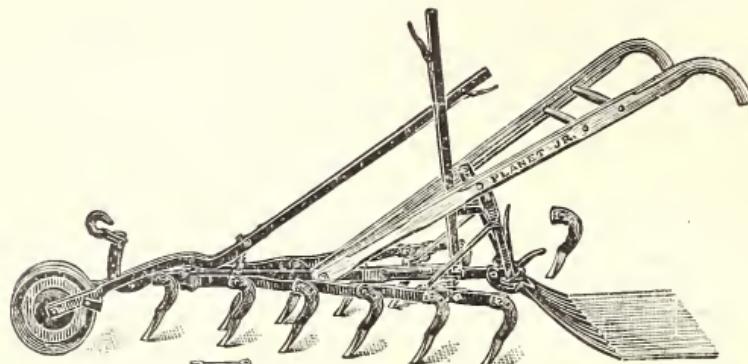

NO. 77-D CULTIVATOR

No. 77D All steel Riding cultivator. Perfectly balanced, no weight on horses except the forward pull. Clear view of row being cultivated, no ratchets or axles to obstruct your sight. $32\frac{1}{2}$ " clearance under frame allows cultivation of quite large stock.

Price \$75.00 as illustrated. Extra attachments can be supplied if desired.

Constant cultivation with these machines saved us thousands of dollars during the past summer when we had one of the worst droughts on record.

NO. 90 12-TOOTH HARROW WITH PULVERIZER

No. 90 12-TOOTH HARROW is surely the ideal cultivator for the nurseryman. Wide rows, narrow rows. Big stuff, little stuff. It is all the same for this little machine.

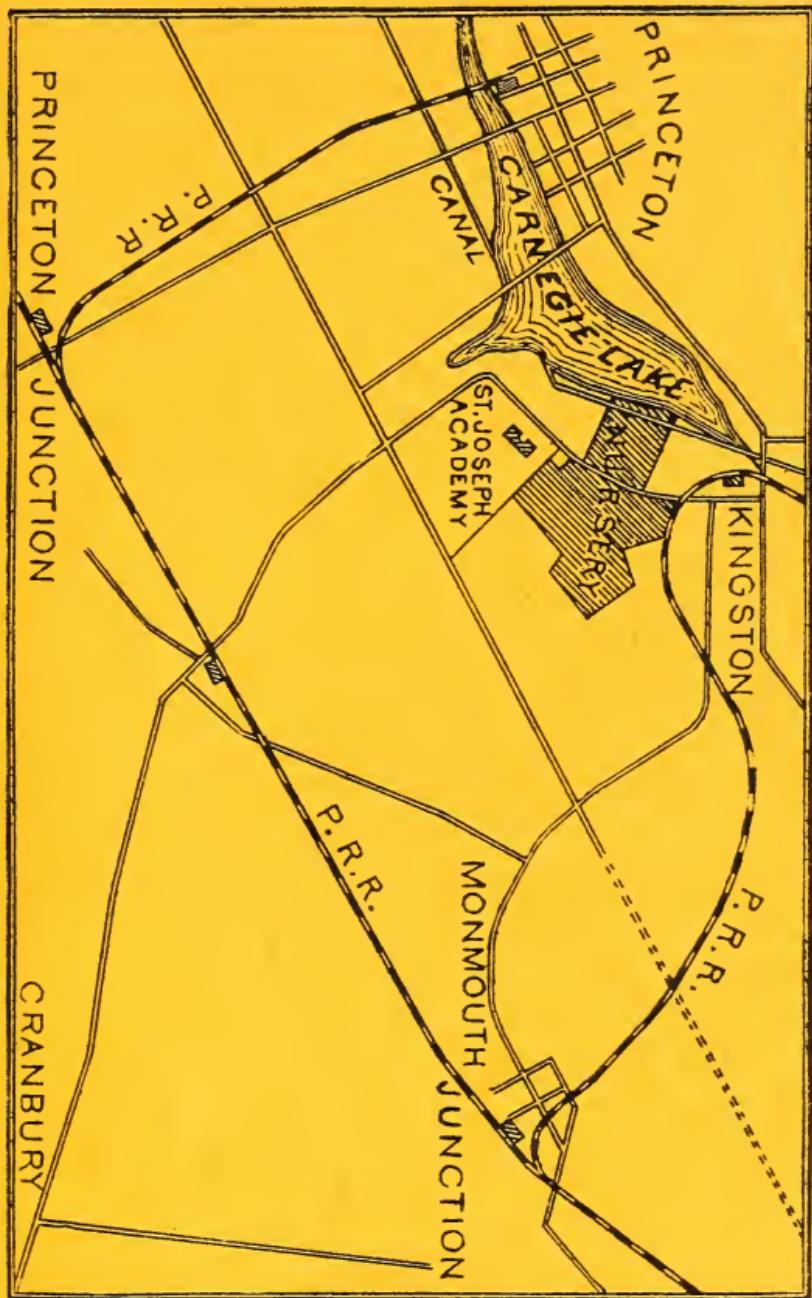

The chisel shaped teeth and pulverizer work up the finest possible dust mulch against the hot dry summer days.

Depth regulated instantly. Cultivates any width from 12 to 32 inches equally well. You can't afford to be without at least one of these.

Price \$17.50 as illustrated. Wheel and Pulverizer may be omitted if desired.

Freight and Express

A Pennsylvania Railroad siding at our packing shed enables us to make shipments to all points with minimum exposure, both carloads and less.
